The screenshot shows the landing page for 'MAGICIANS' AI WIZARD'. The page has a dark blue background with gold and white text. At the top, there's a navigation bar with the site's name and a list of features: 'Effect Engine • Show Planner • Rehearsal Studios'. The main heading is 'THE OPERATING SYSTEM FOR PROFESSIONAL MAGICIANS.' followed by a subheading 'Write, rehearse, and run your entire show — powered by AI. Think of it as your AI director, rehearsal coach, and business manager — all in one.' Below this is a blue button labeled 'Open the App' with a yellow arrow pointing to it from a red box labeled 'Click Button'. To the right of the button is a smaller text 'Free to try • No set...'. Below the button is a section titled 'WHAT IT HELPS YOU DO' with four cards: 'Create' (Generate effects, scripts, and performance ideas instantly), 'Rehearse' (Get real-time AI feedback on delivery, timing, and stage presence), 'Refine' (Polish your material with structure, timing, and audience-focused improvements), and 'Perform & Grow' (Plan shows, manage clients, and run your magic business). On the right side of the page, there's a section titled 'WHAT YOU CAN DO INSIDE' with a subheading 'Use the full wizard experience in your browser (bookmarkable like a web app). Your ideas become a working show plan—ready for rehearsal and performance.' Below this is a card for 'Generate → Import: send an Effect Engine routine straight into the Show Planner as a Performance Beat.' and another card for 'Organize: prioritize beats, track notes, and...'. At the bottom left, there's a section titled 'Why magicians use it: stop juggling separate tools for ideas, rehearsal, and show planning. This gives you one continuous workflow from concept to performance'.
